Presentation of “From Planning to the Automation of Management and Results Indicators”	11
---	----

Step 1

Evaluation of attitudes and methodological capacity in planning and measurement. Is there a desire to improve the planning process with measurement awareness?	17
--	----

Step 2

The technique of content formulation for the elements of the plan: Does the content of the elements of the plan, subject to measurement, establish the right indicators?	27
--	----

Step 3

The development of First-Level Indicators: How can we create Regular and Dysfunction Indicators to quantify an aspect of a plan element?	38
--	----

Step 4

Development of the First-Level Indicators Dictionary: Is the content of a First-Level Indicator clear enough to be quantified?	48
--	----

Step 5

Development of Second-Level Indicators: Do we have the capacity to verify compliance with the intentionality contained in an element of the plan?	54
---	----

Step 6

Prioritization of Second-Level Indicators: Do we know the KPIs for both Management and Results that will govern decisions and communications in the organization?	94
---	----

Step 7

The Documentation of Second-Level Indicators: Do we	
---	--

know the data sheet features (the characteristics) of each of the formulated indicators? 105

Step 8

Elaboration of Arithmetic Criteria Data Sheets to Quantify, Measure and Calculate External Environment, Results, and Management Indicators: Is there an ability to read and use arithmetic criteria in your organization? 114

Step 9

Identifying Causes and Recommendations based on the deviation in the Calculated Value of an Indicator: How do we react to the performance behavior of an indicator? 160

Step 10

Analysis and interpretation of Management, Results and External Environment indicators: Do we know how to narrate the behavior of indicators? 181

Step 11

Improvement and Creation of Presentation Tools to Demonstrate Compliance with the Plan: Does the organization's presentation tools let us express adequately the strategy's execution? 191

Step 12

Standardization of the Manual for Planning, Measurement, Evaluation, and Organizational Communication: Is the process and system of Strategic and Operational Planning, Measurement, and Accountability adequately documented? 198

Step 13

Automation of the Indicators System: Do we know how to align the automation criteria with the process from planning to accountability? 213
